

Ready to Lift

Safe, mobile lifting for everyday material handling

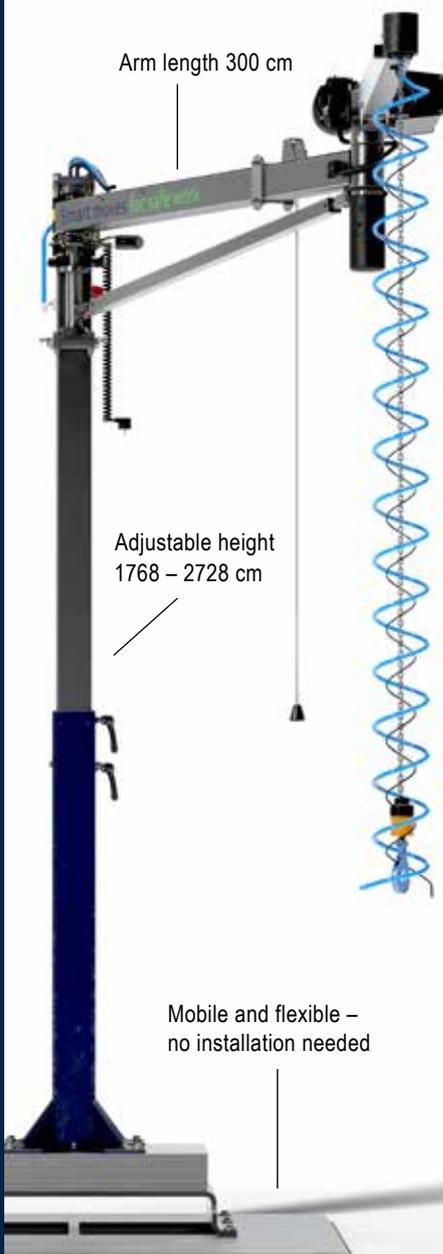

Ready to Lift

Ready
to Lift
by Pronomic

Smart, mobile systems for everyday lifting

Ready to Lift is Pronomic's ready made range of lifting solutions. Instead of starting from scratch, you choose a standard solution that is already designed, tested and ready to install. The result: faster projects, simpler decisions and safe, ergonomic lifting from day one.

WHY CHOOSE READY TO LIFT

Production changes fast. Layouts are updated, new products are introduced and there is constant pressure to improve safety and ergonomics – often with limited engineering resources. Ready to Lift is designed for this reality. Each solution combines proven components with clearly defined performance and scope.

- **Quick to choose** – clear options for typical lifting tasks
- **Quick to install** – complete solution in one package
- **Easy to use** – intuitive, ergonomic handling for operators

A MOBILE CRANE SYSTEM

The first product in the Ready to Lift range is an ergonomic and high quality crane system, delivered as a complete package. One solution covers several typical lifting tasks in your production.

- One crane platform for multiple work areas
- Standardized, repeatable handling instead of improvised lifting
- Engineered, premium bearings and high-quality components
- A wide variety of applications

WHO IS IT FOR?

Ready to Lift is ideal for manufacturers who want to reduce manual lifting and improve ergonomics, and who aim to standardize lifting methods across stations, lines or sites. It also enables you to quickly implement reliable lifting solutions when production changes.

With Ready to Lift, you do not just buy a single product; you choose a practical, ready-to-use lifting solution that is easier to specify, easier to install and easier to roll out as your production evolves.

A GROWING PRODUCT RANGE

Ready to Lift starts with crane systems. Over time, the range will be expanded with additional ready-to-use products, so that you can use the same simple approach across even more of your material handling.

You can always choose:

- **Tailor made** lifting systems for unique or complex applications
- **Ready to Lift** products when flexibility is the priority

In both cases you get the same engineering expertise, product quality and long-term support.

APPLICATIONS

PANELS	EasyPanel 60 	EasyPanel Tilt 60 
	<ul style="list-style-type: none">  60 kg  230 VAC / 10 A  6 bar  1 600 mm  - 	<ul style="list-style-type: none">  60 kg  230 VAC / 10 A  6 bar  1 600 mm  90°
ROLLS	EasyRoll 	EasyRoll Tilt 
	<ul style="list-style-type: none">  60 kg  230 VAC / 10 A  -  2 000 mm  - 	<ul style="list-style-type: none">  60 kg  230 VAC / 10 A  -  2 000 mm  90°
SACKS	EasySack 	
	<ul style="list-style-type: none">  25 kg  230 VAC / 10 A  6 bar  2 000 mm  - 	<p>This tool delivers impressive performance, handling everything from loosely packed paper bags to various industrial sack types. Always with ease and reliability in operation</p>
