Pharmacy model

 **PRONOMIC®**

Crate lifter Lift&Drive™ 70E

- specially designed for Pharmacies

Lift&Drive™ 70E designed with a focus on ergonomics, ensures an efficient and safe working environment by reducing the risk of strain injuries.

The trolley is light and very maneuverable, perfect for lifting and transporting of crates, cartons and similar items. It makes tasks such as restocking of shelves a great deal easier.

The basic version is equipped with an up-and-down foldable loading platform and a fork, specially designed to carry pharmacy crates. The Pharmacy trolley is easy to use and requires almost no maintenance.

The battery charger is handily placed in a holder on the trolley and can easily be connected to a standard outlet for recharging. The trolley is sturdy and solidly built; a truly durable product made of aluminum and lacquered steel.

The trolley manages loads up to 70 kg. It has built-in protection against crushing injuries and bears the CE Conformity Marking.

Loading platform and handlebar

The platform of the pharmacy model can be folded up vertically and down horizontally.

Under the platform is a fork, specially designed to carry pharmacy crates. The height of the platform can easily be adjusted using the control box.

The maneuvering device is detachable and handily placed in a holder on the trolley's handlebar

With the platform tipped up, the fork can be used to lift crates, whole stacks of them simultaneously if necessary.

Fold down the platform in case you wish to handle or lift cartons, boxes and such items.

The height of the handlebar can easily be adjusted, quickly allowing each user to fix it at a comfortable height.

Technical data

The Pharmacy model is our neat and maneuverable lift trolley, specially designed to facilitate work in pharmacies.

The chassis is merely 435 mm wide, which makes the trolley very light and easy to maneuver. Despite its slight dead weight the trolley manages loads up to 70 kg. The mast

possesses a screw drive and is available in different heights.

For maximum safety the trolley is equipped with a built-in release function to prevent the trolley from tipping over and accidents involving squeeze injuries.

The trolley is CE marked.

Masten	Overall height standard	Overall height low built	Total lifting height standard	Total lifting height low built	Length of stroke
-250	1442 mm	1413 mm	1123 mm	1094 mm	984 mm
standard	1692 mm	1663 mm	1373 mm	1344 mm	1234
+250	1942 mm	1913 mm	1623 mm	1594 mm	1484
+500	2192 mm	2163 mm	1873 mm	1844 mm	1734
Minimum lifting height, standard, low built		139, 110 mm
